

Creating a link

1

Within the Drupal Text Editor, click the image or highlight the text you would like to become a link.

2

With the image selected or text highlighted, click the Linkit icon

3

Select the destination of the link by:

1. Search for the page on the site to link to with the **Search content** field
 2. **Open the file browser** and link to an existing image or document on the site
 3. Enter in the **target path** for external webpages
- * Using option 1 or 2 will automatically fill in the Target Path

Search content

Start typing to find content or paste a URI. Use the arrow keys to navigate.

Open file browser

Target path *

Examples: node/123, http://www.example.com/path#anchor

Insert link Cancel

4

Click Insert Link and the selected image or highlighted text will be linked to the target path

Search content

Start typing to find content or paste a URI. Use the arrow keys to navigate.

Open file browser

Target path *

Examples: node/123, http://www.example.com/path#anchor

Insert link Cancel

Insert link
